| 004    | Beef    | Steer  | 18         |
| 005    | Beef    | Cow    | 38         |

R.A.C.E Mob Entry GUI

## Enter Mobs Without Effort

### Easy Mob Entry:

The R.A.C.E. Mob Entry module provides a point of data entry for stock received and due to be slaughtered. Stock can be of any user defined type.

### Complimentary Software:

The Mob Entry module complements the RACE Weigh Grade product, with real-time mob data available to Weigh Grade stations using this Mob Entry module. Entry of data is easy, simple and fast. Much consideration has been given to the 'Slaughter men' and to the nature of their job, hence the importance for ease of use and the minimal amount of inputting required on their behalf.

### Open System Design:

We configure our software to work with your existing onsite systems, increasing the ease of integration and reducing installation costs.

### We want to work with you!

R.A.C.E. software has been designed with customisation in mind. With almost 20 years experience in the meat industry, we understand that different companies have different software requirements. R.A.C.E. encourages our customer to actively work with us so we can provide the most suitable and effective software solution.

### Features & Advantages:

- Easy to view and input mob information
- Supports any number of user defined stock types
- Designed to interface with the RACE Carcass Weigh Grade and RACE Management Suite products
- User configurable fields to collect relevant and specific data

### Hardware Requirements:

- 300Mhz or faster, 64 megabytes RAM
- 30MB Hard Disk Space
- Windows Based Operating System
